# RISE!

Reimagining and Innovating Strategies for Enrollment

Technology Infrastructure
Co-Chairs: Chris Westby & Yelizaveta Adams

Technology Infrastructure

Definition of Technology Infrastructure

The hardware, software, and network components that support the information management requirements of the college in order to provide seamless, user friendly, integrated services to the WCC community.

Guiding Questions

1. How can we reimagine technology infrastructure and the use of existing or new technology to support 21st century teaching and learning?

2. How can we reimagine technology infrastructure and the use of existing or new technology to provide exemplary digital, online, and remote student services?

3. What technologies could provide WCC with optimal reach to both current and potential target markets?

Technology Infrastructure
