and Purposes Behind
Famous Works of Art**

**FACILITATOR:
Dr. Gary Klein**

DESCRIPTION

Many people believe that what makes a “masterpiece” is due solely to the innovative techniques employed by the artist such as the use of color and light. In this presentation of salient works of art, Dr. Klein will show that the underlying ideas that the artist was trying to convey to society can often account for its fame both in its own time and more importantly in the present day.
